# hp C4182X ultraprecise maximum capacity print cartridge

## Maximum output at minimum total cost

Compatible with the new HP LaserJet 8150 series of printers, the HP LaserJet 8100 series of printers and the HP Mopier 320, the HP C4182X Ultraprecise maximum capacity print cartridge is designed to deliver high page yields and low total cost of ownership. The cartridge will print 20,000 pages at 5% coverage (34,000 pages according to EPML guidelines when using the "Dr Grauert" letter based on ECMA-132/ISO 10561). This is 34% more than the standard print cartridges for previous HP printer models and will generate overall cost-per-page savings of up to 15% compared to the HP C3909A (designed for the HP LaserJet 5Si, HP LaserJet 8000 series printers and HP Mopier 240 models). Fitted with HP Magnetic Seals to prevent toner leakage and new HP Toner gauge technology to monitor actual toner usage, the HP C4182X will produce high-quality output throughout its life, with minimal printer interaction and downtime.

## Satisfying the most demanding users

The HP C4182X Ultraprecise maximum capacity print cartridge is designed to work together with HP LaserJet 8150 series printers, HP LaserJet 8100 series printers and the HP Mopier 320 to ensure optimum print quality and outstanding reliability in the most demanding networked printer environments. The result is a reliable and efficient high-volume printing solution to enhance your business productivity.

### Features

- Up to 15% cost savings over the HP C3909A LaserJet print cartridge
- Fast, top-quality output throughout thousands of pages, with less printer maintenance
- Cartridge will print 20,000 pages at 5% coverage (34,000 pages according to EPML guidelines when using the "Dr Grauert" letter based on ECMA-132/ISO 10561)
- 34% more capacity than the HP C3909A LaserJet print cartridge
- New HP Toner gauge technology for a true indication of toner levels
- Tested to HP's strict quality standards
- Designed as an integral part of the HP LaserJet 8150 series, HP LaserJet 8100 series and HP Mopier 320 printing system
- Lifetime warranty (until toner supply is depleted)
- Fraud-proof HP-branded pull-tab confirms you are using a genuine HP print cartridge
- HP Ultraprecise technology using extra-fine toner ensures more even distribution for crisp black text and graphics
- Magnetic seals prevent toner leakage, ensuring lifelong performance and a clean printing environment
- Higher capacity and yield means fewer empty cartridges to return for recycling\*

### Benefits

- Excellent value for money and a lower overall cost of ownership
- Minimal printer interaction, with fewer cartridge changes, less frequent ordering and reduced inventory
- Reduces delivery and inventory costs
- Reliability you can depend on for the life of the cartridge
- Clear, sharp output from the first page to the last
- Kinder to the environment

\* For more information about recycling, please refer to the FAQ section of the HP supplies web site at: [www.hp-go-supplies.com](http://www.hp-go-supplies.com) or contact your local hp representative

# hp C4182X ultraprecise maximum capacity print cartridge

## Frequently Asked Questions

### What's different about this cartridge?

The HP C4182X Ultraprecise maximum capacity print cartridge is optimised for yield and will print 20,000 pages at 5% coverage (34,000 pages according to EPML guidelines when using the "Dr Grauert" letter based on ECMA-132/ISO 10561). This is more than any previous HP print cartridge and gives a cheaper cost-per-page than most other network printers. The HP C4182X print cartridge also features the latest HP Tonergauge technology for accurate toner level monitoring.

### How will the new cartridge lower my cost of ownership?

Due to its high yield, the cartridge gives a low cost-per-page. It also results in less interaction with the printer, lower inventory and fewer empty cartridges to dispose of. The printer and the cartridge are designed to work together to minimise repair costs, extend printer life and maintain optimum productivity.

### What is HP Ultraprecise?

This is HP's term for a major innovation in print cartridge design and toner formulation. The cartridge features the new HP Tonergauge technology for more precise toner level monitoring and HP Magnetic Seals to ensure a clean printing environment. Both reduce printer downtime and provide uninterrupted service to user applications. Extra-fine toner produces smoother greyscale, finer detail and true-to-life contrast between subtle photographic shades. The cartridge can hold more of this new toner which means more output per cartridge, and fewer cartridges to buy, store and dispose of. HP Ultraprecise LaserJet print cartridges also feature a fraud-proof pull-tab, embossed with the HP logo, to prove you are using a genuine HP print cartridge.

### How does the HP Tonergauge technology work?

Unlike a simple "toner low" indicator, HP Tonergauge technology measures the amount of toner left in the cartridge. By comparing this to the amount of pixels in the document you are about to print, it can let you know if you will not have enough toner to complete the print job. HP Tonergauge technology also gives you an accurate picture of the current level of toner in your cartridge on a gauge which can be checked by network managers and users. This is shown either through the printer toolbar available in their printer driver software, on the printer's LCD indicator, or through HP Jetadmin software.

## Product Specifications
