

Stereo earphones SEP-6

Meet the Stereo Earphones SEP-6 – your new companion for incredible, high-res sound. Whether you're getting a thrill out of your favorite playlist or tuning into a podcast, the SEP-6 gives you pure, uninterrupted audio bliss. With a state-of-the-art wired connection and the latest BT8936T tech, you won't face any glitches and instead, enjoy seamless listening.

These earphones deliver excellence with dual 14.2mm drivers that cover an impressive 20Hz to 40kHz range. They bring out the rich bass and crisp highs that make every song an experience. Thanks to the PET speaker membrane, you'll feel like you're front row at a concert, no matter where you are. And at just 11.5g, these earphones are so lightweight, you'll barely notice you're wearing them – except for the amazing sound.

Got any calls to take? The SEP-6 has you covered with a built-in mic that keeps your voice clear and natural. Plus, the Type C input makes them super easy to plug in and play, so it's a perfect fit for your modern devices, too.

Crafted from sturdy yet comfortable ABS+PC materials, these earphones are designed for daily life – commutes, workouts, or just relaxing at home. With the SEP-6, every listen is more than just sound; it's a moment of pure enjoyment. Try them out and make every note, beat, and call count.
