

DELL 34 CURVED GAMING MONITOR | S3422DWG

34" curved WQHD monitor with VESA Display HDR 400, 21:9 aspect ration, and a 144Hz refresh rate providing a truly immersive gaming experience.

See every detail: 34" 1800R curved screen with 21:9 aspect ratio and 3-sided ultra-thin bezels that envelope you with minimal distractions.

A new view: WQHD resolution (3440x1440) offers 34% more screen pixels than QHD giving you sharp, crystal-clear details and a panoramic view

The full spectrum: VA panel technology delivers an expanded 3000:1 contrast ratio and boasts a 90% DCI-P3 colour coverage with 16.7 million colors – which means deeper blacks, brighter whites and vibrant colours across a wide viewing angle.

Uncompromised clarity: The Dell 34 Gaming Monitor is VESA DisplayHDR™ 400-certified, allowing you to see more detail and color than an SDR display, and ensuring remarkable clarity and high contrast for strikingly lifelike visuals.

A smoother experience: A 144Hz refresh rate allows quick-moving visuals to be seen with incredible clarity for speedier reaction times. Faster reaction times means you stay ahead of the competition. Plus, a 1ms MPRT/2ms GtG (Gray-to-Gray) response time gives you seamless performance without motion blur. The S3422DWG is also enabled with gaming console VRR supportability.

Bold new look: The distinct and gaming-centric design offers both functional and aesthetic benefits for gamers, such as a downlight for ambient lighting during low-light gaming sessions, and uniquely-designed vents located in the back keeping everything cool while working hard.

More room for battle: The newly designed tapered stand is sturdy and sleek, with a small footprint that brings you closer to the action.

Customize every advantage: The new joystick and shortcut buttons on the back of the monitor allow you to easily navigate and manage the OSD menus while three user-defined profiles give even more personalisation options. The Timer, FPS (frames per second) Counter, and Dark Stabilizer let you manage everything from frame rates to brightness to shadow control.

Game comfortably: The easy height and tilt adjustability allow you game in comfort for extended periods.

Maximum reliability: Dell Premium Panel Exchange allows a free panel replacement during the Limited Hardware Warranty³ period even if only one bright pixel is found.

A brand you can rely on: As the No.1 monitor company worldwide* we take pride in our unyielding commitment to quality and the utmost satisfaction of our customers.

Minimise downtime with Dell's Advanced Exchange Service.²

FEATURES & TECHNICAL SPECIFICATIONS
