## Short Description

- **Tool Type:** Modular crimping tool.
- **Compatible Plugs:** RJ45, RJ12, RJ11, DEC.
- **Connector Sizes:** 4P/2C, 4P/4C, 6P/4C, 6P/6C, 8P/8C.
- **Mechanism:** Ratchet for consistent full-compression crimps.
- **Construction:** All-metal body.
- **Included:** Screwdriver for blade adjustment.

## Description

The equip® 129409 is a professional modular crimping tool for RJ45, RJ12, RJ11, and DEC plugs in 4P/2C, 4P/4C, 6P/4C, 6P/6C, and 8P/8C formats. One tool covers virtually every

modular connector you'll terminate.

The ratchet mechanism is the difference between a crimp that holds and a crimp that fails on day two. It locks closed until every contact reaches full compression, then releases — so every plug comes out consistent, even after a long install.

All-metal construction stands up to daily site work, and the included screwdriver lets you adjust blades or swap dies without hunting for a tool. Built for network installers and telecom techs producing patch cables in offices, server rooms, and structured cabling jobs.
