

333312 6-Outlet German Power Distribution Unit with Circuit Breaker

Product Images

Short Description

- Power plug : Schuko CEE7/7 90° Angled
- 6 x DIN49440 (Schuko)
- Rating: 2500V 50/60Hz / 16A
- Maximum power: 3500W
- Cable SPEC:H05VV-F 3G 1.5 mm² x 1.8M
- With 2P Circuit Breaker (Class C)
- Material: Aluminum Shell
- 1U Horizontal installation

Description

The Equip Power Distribution Unit is a sturdily-built product designed to distribute clear and crisp electricity. The product is thoroughly tested to ensure the functionality and reliability. Attached with an 1.8m cable, easy-to-install mechanical design, this is the ideal choice for the 19" cabinet system installation.

2P circuit breaker:

It is a switch that automatically disconnects as long as the current in the circuit exceeds the rated current. It is a very important electrical appliance in the low-voltage power distribution network and electric traction system. It integrates control and multiple protection functions. In addition to completing the contact and disconnection of the circuit, it can also protect the circuit or electrical equipment from short circuits, severe overloads and undervoltages.

2P circuit breaker can control the on and off of two or three lines at the same time, ensuring that the power supply can be completely cut off in the event of a fault, protecting the safety of equipment and personnel.

Additional Information

Harmonized System (HS) code	853669
Customs product code (TARIC)	8536699083
Color	Silver
EAN	4015867223109
Model Number	333312
Shell material	Aluminum
Outlets	Schuko Outlets
Plug type	Schuko CEE7/7 90° Angled
Approval and Compliance	CE, RoHS
Package Contents	6-Outlet German Power Distribution Unit Quick Installation Guide
Cable Length	1.8m
Dimensions (W x D x H)	45 x 45 x 482.60 mm
Product weight (kg)	0.79
Mount	19" rack mount
Power input	250V 50/60Hz / 16A
