FUJITSU Server PRIMERGY TX1330 M4 Tower Server

Highly expandable advanced server for typical SME business requirements

Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. FUJITSU Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and density-optimized multi-node servers. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY TX1330 M4
The FUJITSU Server PRIMERGY TX1330 M4 is an advanced technology, highly expandable and robust mono-socket server to meet multiple industry plus classic small and medium-sized enterprise requirements. It features the latest compute and memory for appropriately sized workloads such as file/print, web, ERP/CRM, email, business specific applications plus use cases with high storage requirements such as centralized storage and databases. It features the latest powerful Intel® Xeon® E-2200/E-2100 product family processors with up to 128GB DDR4 memory at 2,666 MT/s, to boost application performance. The new processors with higher core counts, higher speed plus the doubled memory capacity allow customers to handle demanding workloads without moving to more expensive units. The server has high levels of secure expandability with up to 24x 2.5-inch hot-plug storage devices (3.5-inch drive configurations are also available) along with 4x ultra-fast NVMe devices (up to 16x 2.5-inch devices can be fielded alongside), advanced RAID controllers (up to 4/8GB cache) and data back-up

options, making it ideal for consolidating and managing large datasets. Up to 4 PCIe slots are available to add RAID cards, networking options (such as 10/25 Gb controllers). High availability features such as the optional Fujitsu Battery Backup Unit, high-efficiency (94%), redundant power supplies or redundant fans ease operator concerns and provide investment protection. The aesthetic design makes it suitable for deployment in public areas such as showrooms, retail premises or offices. New generation technologies include M.2 modules for efficient OS installation along with Dual microSD capability for VMware ESXi, plus USB 3.1 Gen 2 ports. Furthermore, advanced server management is available via iRMC S5, the Fujitsu ServerView® Suite, and a free ISM Essential license. These provide administrators with comprehensive support across server installation, deployment and administration.

Note: Check the product configurator for the server compatible components currently available at launch.

Features & Benefits

Main Features	Benefits
Advanced technology for workload-versatile performance ■ Wide range of compute/memory with the combination of the latest Intel® Xeon® E-2200/2100 processors, and up to 128GB DDR4 memory (4 DIMMs) at 2,666 MT/s. Affordable Core™ i3 and Pentium® processors are also available. High storage and networking expandability with the server supporting up to 4x NVMe devices plus either 8x3.5-inch storage devices or 16x2.5-inch devices. Maximal capacity with standard drives is up to 12x3.5-inch devices, or up to 24x2.5-inch devices. It also supports Fujitsu's powerful RAID controllers (including SAS 3.0, 4/8 GB cache). Backup options include LTO and RDX. Security optimization includes TPM 2.0 support plus Fujitsu's secure 3-way lock for server access. Server also features redundant (2x1GbE) LAN as standard plus advanced networking options (10/25Gb Ethernet, Fiber Channel controllers).	■ The server compute and memory can be optimized for most appropriately sized standard workloads across industries with the Intel® Xeon® E-2200 processors offering the highest performance in the toolbox. The workloads can range from appropriately sized, individual to virtualized multi-app environments including workloads such as file/print, email, ERP/CRM, messaging, centralized data storage and industry specific applications. The new higher core count, faster processors and doubled memory capacity make these servers suitable for more powerful applications than their previous generation. In terms of storage and networking, NVMe drives offer ultra-fast storage for low-latency applications, while the server's huge storage capacity offers secure, cost-effective capability to consolidate and manage large datasets, combined with growth potential. Redundant LAN offers reliable data connectivity out of the box. Advanced options such as 10/25 GbE or Fiber Channel networking cards offer high data transfer for demanding environments, e.g. virtualized environments or centralized storage.
Future ready plus capabilities for enhanced utilization ■ 4x PCIe Gen3 slots for expansion and deployment flexibility via rack upgrade capability. Support of 2x M.2 modules: 1x SATA; 1x NVMe/SATA and Dual micro-SD modules for efficient boot requirements. New 3.1 Gen2 USB ports (2x 3.1 Gen2 plus 2x 3.1 Gen1, 4x 2.0, Internal 2x 3.1 Gen1) for enhanced connectivity.	■ PCI expansion slots permit timely, cost-effective upgrades in line with your business growth. Upgrade the server with a graphics card, or Fujitsu RAID controllers for reliable data storage or advanced networking options for seamless data transmission. Similarly, a rack kit provides investment protection; as their business grows, customers can deploy multiple PRIMERGY TX1330 M4 servers in a rack. For effective boot options choose from amongst cost-effective and reliable mirrored SATA modules or deploy high-speed NVMe devices, while Dual microSD modules support mirrored VMware ESXi boot. Technology update with new high data rate USB is good for latest generation peripheral devices.
Designed for expanding usage scenarios and efficiency ■ High efficiency 450W power supplies (94% efficiency) are available with both hot-plug capability and redundancy. Fujitsu Battery Backup Unit an optional Internal UPS in modular PSU form-factor, 5 years lifetime, fully integrated. Furthermore, Optimized air flow and Fujitsu's Cool-safe ® Advanced Thermal Design technology offer expanded deployment capability.	■ Good for the environment, and your business – the high efficiency, redundant power supplies offer enhanced reliability and lower energy expenditure. The Battery Backup Unit protects your valuable investment by supporting safe power down and expanded server operation time in case of power loss. The air flow and Cool-safe ® Advanced Thermal Design technology allow for an expanded range of operation (5 °C to 45 °C) and also reduce noise emissions, making the server suitable for deployment in public areas.
Full server management features and easy serviceability ■ Comprehensive software management suite and easy to service design to reduce your IT administrator's burden plus serviceability features are part of the design.	■ Reduce your IT administrator's burden by simplifying server management via a comprehensive software suite which can include the iRMC S5 and the Fujitsu ServerView suite, which includes tools for installation and deployment, permanent status monitoring and control. The new ISM Essential offers converged infrastructure monitoring and server management free of cost. Enhanced serviceability allows easy, fast and comfortable access to critical components.

Interfaces

USB 2.0 ports	4 (4x external rear)
USB 3.0 ports	4 (2x internal, 2x external front, USB 3.0 is now known as USB 3.1 Gen 1). **Server also has 2x external rear USB 3.1 Gen 2 ports**
Graphics (15-pin)	1 analog graphics interface derived from iRMC (up to 1600x1200 or 1920x1080 at 16bpp)
Serial connection	1 x serial RS-232-C
LAN / Ethernet	2 x1 Gb/s Ethernet; RJ45
Management LAN (RJ45)	1 x dedicated management LAN port for iRMC S5 (10/100/1000 Mbit/s) Management LAN traffic can be switched to shared onboard Gbit LAN port

Onboard or integrated Controller

RAID controller	Optionally integrated RAID 0/1 or RAID 5/6 controller for SAS base units (occupies one PCIe slot). All hardware storage controller options are described under Components
SATA Controller	Intel® C246, 2 ports used for accessible drives
SATA controller type notes	4 port for internal SATA HDDs with RAID 0, 1, 10 for Windows and Linux;
LAN Controller	Intel® i210 onboard 2 x 10/100/1000 Mbit/s Ethernet iSCSI, PXE-Boot and WoL are supported
Remote management controller	Integrated Remote Management Controller (iRMC S5, 512 MB attached memory incl. graphics controller) IPMI 2.0 compatible
Trusted Platform Module (TPM)	TPM 2.0 module (option)

Slots

PCI-Express 3.0 x1 (mech. x4)	1 x Full height, up to 168 mm length		
PCI-Express 3.0 x4	1 x Full height, up to 168 mm length		
PCI-Express 3.0 x8	2 x Full height, up to 240 mm length notched		
Slot Notes	Optional PCIe to legacy PCI adapter available. In SAS configuration 1x PCI-Express occupied by modular RAID controller.		
PCI-Express 3.0 x4	1 x notched	1 x notched	1 x notched
PCI-Express 3.0 x8	2 x notched	2 x notched	2 x notched

Drive bays

Storage drive bays	3.5-inch or 2.5-inch hot-plug SAS/SATA
Accessible drive bays	3 x 5.25/1.6-inch
Notes accessible drives	all possible options described in relevant system configurator

Drive bays

Storage drive bays	Max. 4x 3.5-inch or 8x 2.5-inch	Max. 12x 3.5-inch or 24x 2.5-inch
Accessible drive bays	3 x 5.25/1.6-inch for 1 x backup drive + 1 x ODD	Accessible drive bays are not available in case of max. storage drive configuration

Fan Configuration

Number of fans	1	2
Fan configuration	1 standard fan	redundant fans
Fan notes	non redundant / non hot-plug	non hot-plug
