

hp no. 17 tri-colour inkjet print cartridges

The HP No.17 (c6625ae) Tri-colour Inkjet Print Cartridge has been developed for HP Deskjet 810c, 816c, 825c, 843c, 840c and 845c printers to deliver outstanding image quality and vivid colour images. This is the only tri-colour inkjet print cartridge specifically engineered to work in these entry level printers and has been designed and priced to deliver competitive costs-per-page for low volume users.

outstanding image quality and vibrant colours

While initial purchase price and economy of use are important, the No.17 cartridge also delivers outstanding photo quality results. Fast drying ink means smudge resistant handling; very small ink drops result in great image resolution, sharp edges and smooth colour transitions; and its drop-in/snap-out design makes it simple to install and replace.

Recent printer driver advances mean that the HP Deskjet 840 series printers use ink extremely efficiently to deliver more pages per ml of ink than was possible on previous inkjet printers. Based on 15% density, the HP No.17 Tri-colour Inkjet Print Cartridge will produce approximately 430 pages of reliable, high quality printing.

features

- specifically designed for hp deskjet 810c, 816c, 825c, 843c, 840c and 845c
- attractively priced
- small ink drops (9.25 picolitres)
- fast-drying ink
- genuine hp print quality and reliability
- hp reallife imaging system
- media flexibility
- drop-in/snap-out design

benefits

- designed to work together with hp printers, papers and films to deliver results that are clear and sharp
- works with many types of papers for a variety of printing needs
- easy-to-use photo quality printing

hp no. 17 tri-colour inkjet print cartridges

frequently asked questions

who will this product appeal to most?

As the No. 17 Tri-colour Inkjet Print Cartridge has been specifically designed for HP Deskjet 810c, 816c, 825c, 843c, 840c and 845c printers, both of which are very competitively priced, our customers are likely to those using their PCs and printers for hobbies, education, entertainment or simply managing the household affairs.

do other tri-colour cartridges work with hp deskjet 840c series printers?

No, the No. 17 cartridge has been exclusively designed for these printers to deliver speed and quality of print for everyday home printing.

is there a choice of ink capacity options?

No, the HP No. 17 cartridge is available in one capacity – 15 ml. Thanks to the printer driver settings, the printer uses ink extremely efficiently, and delivers far more pages than previous HP Tri-colour Inkjet Print Cartridges.

how many pages will the no. 17 produce?

The precise number of pages each cartridge prints depends on the amount of ink coverage on each printout. It is estimated that the HP No. 17 Tri-colour Inkjet Print Cartridge will deliver, on average, 430 pages at 15% print density, which is competitive with other print cartridges in this class.
