

i-tec USB-A/USB-C Dual 4K/60 Hz HDMI Video Adapter

PRODUCT DESCRIPTION

Extend your desktop with two external HDMI monitors. The adapter supports 2x 4K/60Hz including audio signal.

The adapter is suitable for designers, graphic artists and other users who work with multiple screens simultaneously. Its performance allows you to run even the most demanding applications on one or two independent displays, making it ideal for editing 4K/60Hz videos or other Ultra HD tasks.

With "Expand" and "Mirror" modes, you can work with applications on two monitors (e.g. large spreadsheets), work on one monitor and search for information on the Internet on the other, compare several documents at once without having to constantly jump between open windows, view panoramic images on two monitors, view charts and current data simultaneously, view several presentations at once without having to have another computer, etc.

A short, one-time installation of the DisplayLink driver is required before using the adapter. For more information, please visit www.i-tec.pro/setup.
