

MAINSTREAM COMPUTING FOR A VARIETY OF BUSINESS USES

ThinkCentre Tiny-In-One devices enable businesses to upgrade displays and computers separately, but still enjoy the space-saving benefits of an all-in-one device.

ThinkCentre Tiny-in-One 27

Smarter
technology
for all

Lenovo

An all-in-one PC with the performance and flexibility of a separate desktop and monitor. IT admins can upgrade PC and display independently, inserting any ThinkCentre Tiny computer into the rear bay - no cables or tools required. Office-based employees will find it easier to work on the 27" Quad HD display, with an anti-glare screen coating, low blue-light output, wide height and angle adjustment, and instant login via the infra-red facial recognition camera.

REASONS TO BUY

The compact design is great for offices with limited space. The desktop can be placed neatly behind the monitor in a dedicated slot and the monitor can be wall mounted to free up valuable desk space.

Just like any all-in-one, the display on/off button also powers on the PC, and there's a webcam with integrated privacy cover.

For data analysis workloads install a ThinkStation Tiny with a powerful processor. Consider additional DDR4 memory for heavy multitasking.

ThinkCentre Tiny-in-One 27

DISPLAY

Display Size	27"
Resolution	2560x1440
DPI	109 dpi
Aspect Ratio	16:9
Contrast Ratio	1000:1
