

3LCD Technology

Make every presentation shine with the L335 data projector. The 3300:1 ANSI lumens and advanced 3-chip LCD technology delivers images that are of the highest quality, realistic and sharp. Colours are not only natural, but also bright and filled with detail. Put your presentation in the spotlight with the Samsung L335 and make a lasting impression.

Comprehensive connectivity

The Samsung projectors come equipped with a full range of input options that allow you to connect with a full range of digital multimedia devices. The HDMI (High Definition Multimedia Interface) enables the highest resolution images to be transmitted with 100% integrity for a truly breathtaking visual experience.

Powerful stereo sound

The Samsung projectors are the ultimate professional data projectors. With powerful built-in stereo speakers (3W x 2), they exude an air of complete professionalism that adds depth and resonance to presentations.

Clear, focused images

4:3

16:9

You can select between wide screen (16:9) and normal screen (4:3) sizes to help you present perfectly focused images that fully fit your needs.

H/V Keystone capability

Conventional

Samsung Projector

Keystones occur when a projector is not placed exactly in the centre of a projection screen, causing image stretching and distortion. When the projector is placed either above or below centre, Vertical Keystones occur. Horizontal Keystones occur when the projector is at an angle either to the left or right of centre. The Samsung Projectors offer effective Keystone Correction, compensating for imprecise projector placement and delivering perfectly presented projections that appear accurate and exact. Vertical Keystone Correction is in-built on all models; Horizontal Keystone Correction is included on the L335.
